

VASOVIN XL

For the use of a Registered Medical Practitioner or a Hospital or Laboratory only

Abbreviated Prescribing information for Vasovin XL (Nitroglycerin Capsules 2.5mg, 6.5mg) [Please refer the complete prescribing information available at www.torrentpharma.com]

PHARMACOLOGICAL PROPERTIES: Nitroglycerin relaxes smooth muscle.

INDICATION: prevention of angina pectoris due to coronary artery disease.

DOSAGE AND ADMINISTRATION: The initial regimen of Nitroglycerin has been 2.5 to 6.5 mg three to four times a day, with subsequent upward dose adjustment guided by symptoms and side effects.

CONTRINDICATIONS: In patients who are allergic to organic nitrates. Patients with early myocardial infarction, severe anemia, increased intracranial pressure, and those with a known hypersensitivity to nitroglycerin. Patients who are using a phosphodiesterase-5 (PDE-5) inhibitor (e.g., sildenafil citrate, tadalafil, vardenafil hydrochloride).

WARNINGS & PRECAUTIONS: intended for sublingual or buccal administration and should not be swallowed. Severe hypotension; Nitrate therapy may aggravate the angina caused by hypertrophic cardiomyopathy. The drug should be discontinued if blurring of vision or drying of the mouth occurs. Excessive dosage may produce severe headaches.

DRUG INTERACTION: Calcium channel blockers and organic nitrates; aspirin; alteplase; heparin; Tricyclic antidepressants (amitriptyline, desipramine, doxepin, others); anticholinergic drugs; Ergotamine; PDE-5 inhibitors (e.g., sildenafil citrate, tadalafil, vardenafil hydrochloride); Nitrates may interfere with the Zlatkis-Zak color reaction, causing a false report of decreased serum cholesterol.

ADVERSE REACTIONS: Headache, Dizziness, Tachycardia, Postural hypotension, flushing, Nausea, vomiting, Contact dermatitis, Heart rate increase, Vertigo, weakness, palpitation, Syncope, Flushing, drug rash, Methaemoglobinaemia, and exfoliative dermatitis.
