1. Growth in EBITDA margins from 32.2% in FY25 to 35.8% in FY30
2. Revenue CAGR of 12.2% from FY25 to FY30

Responses from EY:

The company has projected an improvement of 3.5% by FY 2030 over FY2025, translating to an average annual expansion of approximately ~0.70%. This is in line with the company's historical five-year performance where the EBITDA margins have improved from 28.4% to 32.20% between FY 2020 and FY 2025 indicating improvement of ~0.8% per annum for the past 5 years.

Further it may be noted that leading India-focused branded pharma peers operating in chronic therapies also have demonstrated stable to improving margins despite cost inflation in last couple of years post-covid. Such EBITDA expansion has been driven by price increases, scale benefits and mix improvement. Margin expansion in last couple of years for some of the industry players have been shown in the table below:

Company name	FY23	FY25	Increase	Avg yearly increase
Abbott India	22.5%	23.6%	1.1%	0.5%

- *76% of India revenues come from chronic & sub-chronic therapies vs 53% for IPM, implying higher stickiness.*
- *The acquired Curatio (Cosmo-Dermatology) Portfolio which contributes to ~6% of India revenues have been growing at >2x Indian Pharmaceutical Market (IPM) growth.*
- *Consumer Health entry adds to ~1% of the incremental growth*

- *Field Force Expansion - Field force increased 1.7x over last 4 years which has expanded prescriber base and geographic reach. This will contribute to the projected growth.*
- *Semaglutide launch in March 26 will be another significant contributor the overall growth and margins.*
- *Demand Outlook*
 1. *Chronic disease prevalence (CV, diabetes, CNS, dermatology) continues to rise in India.*
 2. *Shift toward branded and specialty therapies supports long-term demand visibility.*

of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial results that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial results, the Management and the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Results

Our objectives are to obtain reasonable assurance about whether the standalone financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial results.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial results, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the standalone financial results made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management's and Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial results or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial results, including the disclosures, and whether the standalone financial results represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing specified under Section 143(10) of the Companies Act, 2013 and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. Based on our review conducted as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, including the manner in which it is to be disclosed, or that it contains any material misstatement.

3. Accordingly, the Parties believe that the Scheme is in the interests of the shareholders, employees, creditors and other stakeholders of each of the Parties.

APPROACH FOR FAIR EQUITY SHARE EXCHANGE RATIO

The Scheme contemplates the amalgamation of JCPL into TPL. Arriving at the Ratio for the Proposed Amalgamation of JCPL into TPL would require estimating the relative value of equity shares of TPL and JCPL. These values are to be estimated independently, but on a relative basis for the Companies, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for mergers and our reasonable judgment, in an independent and bona fide manner.

The valuation approach adopted by EY and BDO is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO

The basis of the amalgamation of JCPL into TPL would have to be estimated after taking into consideration all the factors and methods mentioned herein after. Though different values have been arrived at under each of the approaches / methods as mentioned in the Annexures, for the purposes of the Ratio it is necessary to arrive at a final value for each Companies. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach / method.

The Ratio has been arrived at on the basis of value of equity shares of the Companies based on the various approaches/methods explained herein after considering various qualitative factors relevant to each company, business dynamics and growth potentials of the businesses of the Companies, information base and key underlying assumptions and limitations.

While we have provided Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Ratio. The final responsibility for the determination of the Ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

We have independently applied approaches/methods discussed in the Annexures, as considered appropriate, and arrived at the value per share of the Companies. To arrive at the consensus on the Ratio for the Proposed Amalgamation, suitable minor adjustments / rounding off have been done.

Annexure 1A- Approach to Valuation – EY

There are primarily three approaches in valuation (viz., Cost/Asset Approach, Market Approach and Income Approach). For any valuation, all the approaches may not be relevant and therefore will not give a fair estimate of value. Hence, the approach most suitable for that specific business / company must be applied in the valuation exercise, based on the experience and common practices adopted by valuers.

According to IVS 102 “Fair Value is the estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

We have adapted internationally accepted valuation standards and approaches in delivering our valuation conclusion. There are several principal valuation approaches under International Valuation Standard of which we have considered only those approaches to the extent, it is applicable and relevant.

The various approaches generally adopted in valuation are as under:

1. Cost/Asset Approach: Net Asset Value method
2. Income Approach: Discounted Cash Flows (DCF) method
3. Market Approach: Comparable Companies’ Market Multiple (CCM) method, Comparable Transactions’ Multiple (CTM) method and Market Price (“MP”) method

We have used the Market Approach (MP method) and Income Approach (i.e., DCF method) for valuation of both the Companies.

Fair valuation of the Companies factors various intangible assets whether or not recorded in the financials of the respective companies.

Cost/ Asset Approach – Net Asset Value (NAV) method: Under this approach, the net asset value method is considered, which is based on the underlying net assets and liabilities. Cost approach is not considered suitable for pharmaceuticals companies since it does not capture the earnings potential or value of intangibles in the business. Hence, in the present valuation analysis, we have not considered NAV method.

Income Approach - Discounted Cash Flow (DCF) method: Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm. Such DCF analysis involves determining the following:

- *Estimating future free cash flows:*

Free cash flows are the cash flows expected to be generated by the company that are available to the providers of the company’s capital – both debt and equity.

- *Appropriate discount rate to be applied to cash flows i.e., the cost of capital:*

Fair equity share exchange ratio for the Proposed Amalgamation of J.B. Chemicals and Pharmaceuticals Limited into Torrent Pharmaceuticals Limited

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have used Discounted Cash Flow method based on the business plan of the Companies provided to us by the Management.

Market Approach - Multiples method: Under this method, one attempts to measure the value of the shares / business of a company by applying the derived market multiple based on market quotations of comparable public / listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company / business. This valuation is based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

In the instant case, both the Companies are frequently traded on the stock exchanges. Hence, we deemed it appropriate that the MP Method would adequately represent value under Market Approach without the need to rely on Comparable Multiples.

Market Approach - MP method: Under this method, the value of shares of a company is determined by taking the average of the market capitalization of the equity shares of such companies as quoted on a recognized stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered prices over appropriate period up to 27 June 2025.

Additionally, we have also considered the price of Share Acquisition of JCPL.

Fair Valuation:

Annexure 1B- Approach to Valuation – BDO**Basis Of Value**

The Report has been prepared on the basis of “Fair Value” as at Valuation Date. The generally accepted definition of “Fair Value” is the value as applied between a hypothetical willing vendor and a hypothetical willing prudent buyer in an open market and with access to all relevant information.

Premise Of Value

The Report has adopted “Going Concern Value” as the premise of value in the given circumstances. The generally accepted definition of Going concern value is the value of a business enterprise that is expected to continue to operate in the future.

We have carried out the valuation in accordance with the principles laid in the International Valuation Standards, as applicable to the purpose and terms of this engagement.

The three main valuation approaches are the asset approach, market approach, income approach and asset approach. There are several commonly used and accepted methods within the market approach, income approach and asset approach, for determining the value of equity shares of a company, which can be considered in the present valuation exercise, to the extent relevant and applicable, to arrive at the Share Swap Ratio(s) for the purpose of the Proposed Transaction, such as:

- Asset Approach - Net Asset Value (NAV) Method/ Summation method
- Income Approach - Discounted Cash Flow (DCF) Method
- Market Approach - Market Price Method; Comparable Companies Multiples (CCM) Method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies/ businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Asset Approach:Net Asset Value Method

Under the asset approach, the net asset value (NAV) method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus/ non-operating assets.

Fair equity share exchange ratio for the Proposed Amalgamation of J.B. Chemicals and Pharmaceuticals Limited into Torrent Pharmaceuticals Limited

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

Income Approach:

Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

DCF Method

Under DCF method, the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity – Free Cash Flows to Firm (FCFF) technique; This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

Market Approach:

Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

Comparable Companies Multiples (CCM) Method:

Under this method, one attempts to measure the value of the shares/ business of company by applying the derived market multiple based on market quotations of comparable public/ listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company/ business (based on past and/ or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Market Price Method

Under this method, the value of shares of a company is determined by taking the average of the market capitalisation of the equity shares of such company as quoted on a recognised stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of a merger/ demerger, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard. This

Fair equity share exchange ratio for the Proposed Amalgamation of J.B. Chemicals and Pharmaceuticals Limited into Torrent Pharmaceuticals Limited

method would also cover any other transactions in the shares of the company including primary/ preferential issues/ open offer in the shares of the company available in the public domain.

The equity shares of TPL & JCPL are listed on National stock exchange Limited (“NSE”) and BSE Limited (BSE”), and shares are frequently traded under regulation 2(1)(j) of Chapter I of Securities And Exchange Board Of India (Substantial Acquisition Of Shares And Takeovers) Regulations, 2011, therefore we have considered the Market Price Method under Market Approach for the valuation.

Under market price method, the market price as per Securities And Exchange Board Of India (Substantial Acquisition Of Shares And Takeovers) Regulations, 2011 (“SAST”) and Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 (“ICDR”).

SAST

As per the regulation 8(2)(d) of Chapter II of Securities And Exchange Board Of India (Substantial Acquisition Of Shares And Takeovers) Regulations, 2011 (last amended on November 28, 2024), the volume-weighted average market price of such shares for a period of sixty trading days immediately preceding the date of the public announcement as traded on the stock exchange where the maximum volume of trading in the shares of the target company are recorded during such period, provided such shares are frequently traded.

Therefore, we have considered sixty days of volume weighted average price as market price for computation.
ICDR

As per the regulation 164(1) of Chapter V of Securities And Exchange Board Of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 (last amended on March 8, 2025) as amended from time to time (“ICDR”), If the equity shares of the issuer have been listed on a recognised stock exchange for a period of 90 trading days or more as on the relevant date, the price of the equity shares to be allotted pursuant to the preferential issue shall be not less than higher of the following:

- a. *the 90 trading days’ volume weighted average price of the related equity shares quoted on the recognised stock exchange preceding the relevant date; or*
- b. *the 10 trading days’ volume weighted average prices of the related equity shares quoted on a recognised stock exchange preceding the relevant date*

Therefore, we have considered the higher of 90 days or 10 days as of volume weighted average price market price for computation.

Further, the values arrived have been appropriately adjusted for the Share Acquisition by TPL.

III. Limitation of Scope and Review

Our Opinion and analysis is limited to the extent of review of documents as provided to us by TPL and JBCPL including the draft valuation report prepared by the Valuers and the Draft Scheme.

In connection with this Opinion, we have:

- (i) reviewed the Draft Scheme and the valuation report dated June 29, 2025 prepared by the Valuers;
- (ii) reviewed certain publicly available historical and operational information with respect to each of the relevant entities available in their respective annual & interim reports and company presentations;
- (iii) reviewed certain historical business and financial information relating to each of the relevant entities, as provided by the respective companies, and sought certain clarifications with respect to the same;

We have relied upon the Transferee Company and the Transferor Company assurances that they are not aware of any facts or circumstances that would make such information or data incomplete, inaccurate or misleading in any material respect.

We have not carried out any due diligence or independent verification or validation of such information to establish its accuracy or sufficiency. We have not conducted any independent valuation or appraisal of any of the assets or liabilities of TPL and JBCPL, and / or their subsidiaries/affiliates. In particular, we do not express any opinion as to the value of any asset of TPL and JBCPL, and / or their subsidiaries/affiliates, whether at current time or in the future. No investigation of TPL's and JBCPL's claim to title of assets has been made for the purpose of the exercise and the claim to such rights has been assumed to be fully valid. Further, we have not evaluated the solvency or fair value of TPL and / or JBCPL and / or their subsidiaries/affiliates under any law relating to bankruptcy, insolvency or similar matter.

One should note that valuation is not an exact science and that estimating values necessarily involves selecting a method or approach that is suitable for the purpose. Moreover, in this case where equity shares of TPL are being issued as consideration to the shareholders of JBCPL, it is not the absolute per share value that is important for framing an opinion but the relative per share value of TPL vis-à-vis per share value of JBCPL.

We have assumed, with the Transferee Company's consent, that the scheme will be in compliance with all applicable laws and other requirements and will be implemented on the terms described in the Draft Scheme, without any waiver or modification of any material terms or conditions, and that in the course of obtaining the necessary regulatory or third party approvals for the scheme, no delay, limitation, restriction or condition will be imposed that would have an adverse effect on the Transferee Company, Transferor Company and / or their relevant subsidiaries/ affiliates and their respective shareholders. We have assumed, at the directions of the Transferee Company that the final scheme will not differ in any material respect from the Draft Scheme. We understand from the Transferee Company's management that the scheme will be given effect to in totality and not in parts.

We express no view or opinion as to any terms or other aspects of the Draft Scheme (other than the Share Exchange Ratio, from a financial point of view), including, without limitation, the form or structure of the proposed transaction. We were not requested to, and we did not, participate in the negotiations for the proposed transaction. Our Opinion is limited to the fairness, from a financial point of view, of the Share Exchange Ratio proposed by the Valuers, to the shareholders of TPL. Our analysis relates to the relative values of TPL and JBCPL. However, the actual transaction value may be significantly different from the result of our analysis and would depend on a number of factors, including the negotiating ability and motivations of the respective buyer and seller. We express no opinion or view with respect to the financial implications of the proposed transaction for any stakeholders, including creditors of the Transferee and/or the Transferor Company.

We understand, based on the information provided by the management of the Transferee Company and our review of the Draft Scheme, that there will be no change in the terms and conditions of the listed NCDs of TPL pursuant to the Scheme and that the holders of the listed NCDs as on the Effective Date of the Scheme will continue to hold the listed NCDs without any interruption and on the same terms.

We express no view as to, and our Opinion does not address, the underlying business decision of the Transferee Company to effect the proposed transaction, the relative merits of the proposed transaction as compared to any other alternative business strategy, the effect of the proposed transaction on the Transferee Company or its affiliates, including, without limitation, possible implications on ownership structure, listing format, capital structure or trading price of TPL's shares post completion of the proposed transaction. The Transferee Company remains solely responsible for the commercial assumptions on the basis of which it agrees to proceed with the proposed transaction. Our Opinion is necessarily based only upon information as referred to in this letter. We have relied solely on representations, whether verbal or otherwise, made by the management of TPL and JBCPL, for areas where the same has been made.

We do not express any Opinion as to any tax or other consequences that might arise from the scheme on TPL, JBCPL and / or their subsidiaries/affiliates, and their respective shareholders, nor does our Opinion address any legal, tax, regulatory (including all SEBI regulations) or accounting matters, as to which we understand that the respective companies have obtained such advice as they deemed necessary from qualified professionals. We have undertaken no independent analysis of any potential or actual litigation, regulatory action, possible unasserted claims, Governmental investigation or other contingent liabilities to which the Transferee Company, Transferor Company and/or their subsidiaries/affiliates, are/or may be a party.

Our Opinion is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to us, as of the date hereof. We have not factored, in our analysis, the outcome of any contingent events envisioned in the Draft Scheme, other than as represented to us by the Transferee Company or the Transferor Company. It should be understood that subsequent developments may affect this Opinion and we assume no responsibility for updating or revising our Opinion based on circumstances or events occurring after the date hereof. It is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein.

Our Opinion also does not address any matters otherwise than as expressly stated herein, including but not limited to matters such as corporate governance, shareholders rights or any other equitable considerations. We have also not opined on the fairness of any terms and conditions of the scheme other than the fairness, from a financial point of view, of the Share Exchange Ratio proposed by the Valuers, to the shareholders of TPL.

While we have provided our recommendation as to the fairness of the Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Share Exchange Ratio. The final responsibility for the determination of the exchange ratio at which the merger shall take place will be with the Board of Directors of the respective companies who should take into account other factors such as their own assessment of the merger.

We will not be responsible to any other person/party for any decision. Re: valuation report dated 29 June 2025 on Fair equity share exchange ratio for the proposed amalgamation of J.B. Chemicals and Pharmaceuticals Limited into Torrent Pharmaceuticals Limited

Dear Sir / Madam,

This is with reference to the report dated 29 June 2025 on “Fair equity share exchange ratio for the proposed amalgamation of J.B. Chemicals and Pharmaceuticals Limited into Torrent Pharmaceuticals Limited” (the “Report”). We understand that stock exchanges has raised certain queries.

Query

Provide Detailed (PAT) projections for both TPL & JCPL.

Response:

Refer annexures 1 and 2 for forecast up to PAT level received from Management.

Query

Cost approach rationale: A detailed explanation for not assigning any weight to the Cost Approach in the valuation, including the specific limitations or asset characteristics that make this approach less relevant in the present case.

Response:

Net Asset Value (NAV) method under cost approach gives the historical cost of the assets and may not be indicator of the true worth of the assets in terms of income generating potential. For example, entities or certain portion of the businesses could have grown in the past either organically or through acquisitions, and the relative contribution of both these strategies could be different in the 2 entities. This would make the comparison of historical net worth not really on a like to like basis, since intangible/goodwill on acquisition would be lower for entity that has grown organically.

Query

Market price method workings: The complete workings for the Market Price Method, including data sources, selection criteria, adjustments applied.

Response:

Attached in annexure 3 and annexure 4

Query

Recent transaction price workings: The detailed workings for the price of recent transactions considered, including transaction dates, counterparties, comparability assessment, any normalization or adjustments made, and how these were incorporated into the valuation.

Response:

Asset transacted: Equity shares of JB Chemicals and Pharmaceuticals Ltd

Price: INR 1,600 per equity share

Transaction Date: binding agreement signed on 29 June 2025, expected to close after completion of customary condition precedent.

Buyer: Torrent Pharmaceuticals Limited ("TPL")

Seller: Tau Investment Holdings Pte. Ltd

Detail working of price: Not applicable since price independently negotiated between two unrelated parties.

Comparability assessment: directly comparable since represents transaction between informed buyer/seller in the valuation subject itself and no further adjustment made while giving weight to determine the swap.

Sub: Scheme of amalgamation of J.B. Chemicals & Pharmaceuticals Limited ("Transferor Company" or "JCPL") into and with Torrent Pharmaceuticals Limited ("Transferee Company" or "TPL") and their respective shareholders and creditors ("Scheme" / "Scheme of Amalgamation")

Dear Sir(s)/ Madam(s),

This is with reference to the joint report ('Report') issued by BDO Valuation Advisory LLP ("BDO" or "Us" or "Our") and Ernst & Young Merchant Banking Services LLP ("EY") and Valuation Annexure dated June 29, 2025.

Subsequent to this Report, an email was received on December 29, 2025, from JCPL, forwarding the clarifications sought by BSE Limited ("BSE") requesting us to reply on the queries stated below.

Query No. 7. Provide Detailed (PAT) projections for both TPL & JCPL:

Refer Annexures 1 and 2 for forecast up to PAT level received from Management.

Query No. 8. Cost approach rationale: A detailed explanation for not assigning any weight to the Cost Approach in the valuation, including the specific limitations or asset characteristics that make this approach less relevant in the present case:

Cost/Asset approach valuation is mainly used in case where the asset base dominates the earnings capability. In a going concern scenario, the earning power, as reflected under the Income and Market approaches, is of greater importance than the values arrived at on the net asset basis which is based on historical costs and excludes inherent intangibles therefore being of limited relevance. Further, since TPL & JCPL have future earnings potential, we have not considered Cost approach for valuation and have applied DCF Method under Income Approach and Market Price Method under Market Approach for the valuation exercise.

Query No. 9. Market price method workings: The complete workings for the Market Price Method, including data sources, selection criteria, adjustments applied:

Detailed valuation workings considered for computation of the exchange ratio (including workings for Market price) are provided in the Annexure Report dated June 29, 2025. The same has been annexed as a separate file to this document (Annexure 3) for ease of reference.

(this space has been intentionally left blank)

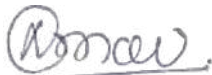

Query No. 10. Recent transaction price workings: The detailed workings for the price of recent transactions considered, including transaction dates, counterparties, comparability assessment, any normalization or adjustments made, and how these were incorporated into the valuation.

We have applied Market Approach using market price as per Securities And Exchange Board Of India (Substantial Acquisition Of Shares And Takeovers) Regulations, 2011 ("SAST") and Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 ("ICDR") & the Income Approach (Discounted Cashflow Method) giving appropriate weightages. Transaction price method has not been applied in the current valuation; hence this query would not be applicable to the valuations performed by us.

Yours Faithfully,

For BDO Valuation Advisory LLP
